

OUR PHILOSOPHY

CREATING FUTURE TECH LEADERS

With cutting edge courses to make your child future ready.

Today, children are growing up as first citizens of the digital world. We want to help parents ensure that their child's relation to technology is not just that of a passive tech consumer. We are not happy with them just being a tech creator either – We want the children to be **Future Tech Leaders!**

Leaders are about Excellence and Independence. Hence, we obsess about building **Independent Coding Confidence** in every single child. That means their learning is not dependent on the teacher, only facilitated by it.

Every project they do – they are measured not just on the output but on their confidence & ability to make it entirely on their own. As ambitious as it sounds, without it we feel we haven't done our job. There is no point copying code or making impressive projects with 90% contribution by the teacher and passing it off as student's project.

Apart from having computer science alums from IIT & CMU as curriculum heads, PurpleTutor is the only platform that:

- Mandates every teacher to have a formal Computer Science degree.
- Has inhouse teacher training, PurpleTutor Academy, where teachers are trained to let the students Lead the curriculum journey as per their creative ideas, ability and interest.
- Ensures each child develops Independent Coding Confidence, and go from being a Coder -> PurpleCoder!

12 people walked on the Moon by the year 1972, but for 50 years since then no human has done so. All that is set to change! Become a part of the **Golden Era of Space Exploration** and join the mission to make humans a multiplanetary species, with ground breaking innovations like Reusable Rockets!

MISSION 1: EXPLORING OUR UNIVERSE

What Will Your Child Learn?

- Get familiarized with the astronomical concepts and vocabulary
- Learn about the cosmos, solar system, planets and outer space objects

What Will Your Child Do?

- 3D design projects depict themes like Planetarium, Galaxy, Solar system, Moon Phases
- 3D visualization and model building

Benefits

-  Three 3D Modeling and Animation Projects
-  One 3D Design model

MISSION 2: REACHING INTO SPACE

What Will Your Child Learn?

- Understanding the structure of Rocket
- Understanding the science behind Rocket launches
- Learn about the technology that controls the rocket/ spaceship in space

What Will Your Child Do?

- Building your 3D Rocket Model
- Designing various internal systems of a Rocket
- Building your Space Station

Benefits

-  Assessment Report
-  Five 3D Models
-  One Rocket Launch Simulation

MISSION 3: COLONIZING MARS

What Will Your Child Learn?

- Exploration of International Space Station, Scientific Experiments in Space
- Life at Space, Risks involved, Design and Analysis of Interiors of Space
- Missions to Moon, Exploration of Apollo11 and its modules

What Will Your Child Do?

- Build Satellite models
- Terrain Analysis of outer space bodies
- Build models of Mars exploration gadgets

Benefits

-  Assessment Report
-  Six 3D Models
-  Three Flight Simulations

SpaceTech Projects

Projects created through SpaceTech by our PurpleTutor Students

SpaceTech

Phases of the Moon

Among the three extra curricular classes Aman has signed up for, PurpleTutor is the one he enjoys the most. He seems to be doing the coding projects on his own all the time, while I constantly need to chase him for the other two!

Ashutosh Wakankar, Aman's father, USA
